

*Fixed-Mount Press-Out*

*Portable Press-Out*

**FIXED-MOUNT** | The Schold Fixed-Mount Press-Out is an extrusion discharge press with a large O-ring seal design. Hydraulic power pack horsepower are available in ranges of three, five and ten as floor-mounted or elevated vessel styles. Sizes range from lab scale to 10,000 lb. batches. With our Fixed-Mount Press-Out, Schold can help customize the function of your unit to provide constant flow-out of the vessel for your downstream critical processes.

**PORTABLE** | The Schold Portable Press-Out is a self-contained, hydraulic press for discharging high viscosity, poor-flowing products. This Press-Out is picked and placed on a process vessel, allowing it to travel with the vessel to the required destination. Once lowered onto the vessel and secured, it can be transported in combination to the canning/filling site. This model is efficient for batches consisting of multiple cans or vessels of similar product.

## WHY CHOOSE SCHOLD

A trusted name since 1949, **Schold** has made breakthroughs and improvements, but one thing has held true—we have continually remained a **client-centric solutions provider**. While we offer a variety of standardized machinery models, we will also work with you to design, fabricate and install entirely **customized solutions** based on your application needs. Beyond installation, it is our commitment to provide unparalleled customer service. You can count on **Schold** for more than just reliable equipment, you can count on us to be a **trusted partner to your business**.

**BETTER  
DISPERSIONS.**
